THE UNIQUE BEAUTY OF CRAFT CABINETRY

WOOD CHARACTERISTICS

At Craft Cabinetry, we recognize that wood cabinetry is as unique as a fingerprint; no two pieces are alike. Each piece of lumber and veneer we use is truly one of a kind. Soil and climatic conditions influence growth characteristics, resulting in mineral streaks, gum spots, and knots, creating striking colors and grain patterns. These natural variations give wood its distinct character and exceptional beauty.

We take great pride in selecting the finest quality kiln-dried hardwoods for our products. Our lumber is dried to a precise 6-8% moisture content to ensure stability. However, wood will expand during humid months and contract during dry seasons. Therefore, maintaining a consistent humidity level in your home is crucial. We recommend a 40-50% humidity level to keep your cabinets in perfect condition, as extremes can cause issues with the natural wood.

The best quality hardwoods have inherent characteristics that cannot be hidden by finishing. These variations result from weather, climate, soil composition, insect activity, and the unique growth patterns of each tree. These traits add to the natural beauty and charm of real wood.

At Craft Cabinetry, we embrace these qualities, knowing they add warmth and sophistication to your home. Our commitment to quality ensures that every piece of cabinetry we create is not only beautiful but also a reflection of nature's artistry.

PRODUCT SPECIFICATIONS

UNDERSTANDING WOOD AND HUMIDITY

Under normal circumstances, all Craft Cabinetry wood products contain some moisture. Similar to a sponge, wood easily exchanges moisture with the environment, even after being finished. While a finish can slow this process, finished wood still reacts to humidity changes. When humidity is high, wood absorbs moisture and expands. During low humidity, it releases moisture and contracts. Wood only changes size or shape with shifts in moisture content due to humidity. Minor humidity variations cause imperceptible dimensional responses in wood.

To prevent issues, maintain household humidity between 40-50%. Extremes above 80% or below 20% can cause problems. Wood products perform best in controlled environments, and warping issues usually result from improper site storage, installation, or use.

PRODUCT SPECIFICATIONS

POINTS TO CONSIDER

- The density of wood affects its reaction to humidity changes; dense species like pant grade hardwoods will expand or contract more than species like Cherry.
- Moisture can cause panel expansion or contraction, joint separation, bowing of the stile or rail, and expansion/contraction of the stile or rail.
- Wood products in humid climates are particularly susceptible to moisture expansion.
- Failures due to high moisture are not covered under the Craft Cabinetry warranty, especially in waterfront properties and coastal regions.
- Products in non-air-conditioned homes are also at risk; winter and vacation homes should maintain climate control year-round.
- Doors may swell and bind after installation but should revert to their original size once climate control is activated.
- Craft Cabinetry does not recommend trimming or shaving door edges, as trimmed doors are not covered under warranty.
- It is important to control humidity during storage and installation to prevent issues.
- Traditional 5-piece doors (stiles, rails, and panels) are designed to accommodate some expansion and contraction. Proper humidity management ensures reliable and beautiful cabinets.

PRODUCT SPECIFICATIONS

CRAFT FINISH

- The finish you select for your cabinets sets the overall tone of your kitchen. With Craft Cabinetry's range of quality colors and door styles, you'll find the perfect combination for your home.
- Choose from light-colored painted finishes, mid-tones, or classic dark stains.
- Light and mid-tone finishes highlight the natural beauty of the wood, while darker stains create a more formal, rich, and elegant look.
- No matter which finish you choose, the quality and attention to detail in each door will bring lasting comfort and style to your kitchen for years to come.

PAINTED FINISH

Craft Cabinetry painted doors are meticulously hand-sprayed and oven-baked, with each layer hand-sanded between coats to achieve a hard and lustrous finish. Our painted doors are then top-coated with a catalyzed conversion varnish, providing exceptional durability and easy cleaning. Due to natural moisture gain and loss, painted doors may develop hairline cracks at the joints, resulting in slight expansion and contraction. This is a normal occurrence and is not considered a defect.

STAINED FINISH

At Craft Cabinetry, doors and drawer fronts are meticulously sanded to create an exceptional surface ready for finishing. A transparent stain is then sprayed over the wood, allowing the grain to develop beautifully. Next, a protective catalyzed sealer, selected for its excellent adhesion, moisture resistance, and sealing qualities, is applied and oven-baked for durability. A tough, catalyzed conversion varnish topcoat is applied using an airless spray system and then oven-baked.

The final varnish and oven-curing system ensure that your cabinetry is well-sealed and protected from scratches, dents, and chips, offering a stunning, smooth, and durable finish that enhances the beauty of your home.

Craft Cabinetry warrants to the original purchaser that all our products will be free from defects in material and workmanship under normal residential use for five years from the date of purchase. This limited warranty is subject to the following limitations and exclusions:

Eligibility: This warranty applies only to the original residential cabinet purchaser and is nontransferable.

Geographic Limit: This warranty is applicable only within the United States.

EXCLUSIONS

As with all natural materials, wood is influenced by environmental factors such as natural and artificial lighting, smoke, and age. Darkening or mellowing is a natural process for wood as it ages, and each wood species exhibits its own distinctive grain patterns and characteristics, adding to its natural beauty. These variations in color, grain, and other naturally occurring characteristics are not considered imperfections or defects. This warranty does not cover natural aging and darkening of the wood color, nor does it apply to the inherent growth characteristics of wood.

- **Finish Variation** - All wood varies in color from piece to piece due to natural differences in tone and grain patterns, especially in woods and veneers like White Oak. These minor variations in color, grain, or uniformity are inherent to natural wood and enhance the beauty and character of the finish. While Craft Cabinetry takes extra steps to select each piece of wood to highlight its natural beauty, we cannot guarantee that every component will exactly match others. These natural variations in finish are not considered defects and are not covered by our limited warranty.
- **Pitch Pockets & Mineral Streaks** - In certain species of wood, pitch pockets and mineral

WARRANTY

streaks are prevalent. This is particularly true of the beautiful lumber used in producing some Craft Cabinetry products. These naturally occurring features are not considered to be defects and are not covered by our limited warranty.

- **Hairline Cracks** - Environmental factors influence the performance of wood products. Due to its cellular structure, all wood absorbs and releases moisture. In periods of high humidity, wood will "grow," and during dry periods, wood will "shrink." Over time, this moisture exchange may cause visible hairline cracks, typically in the joinery of wood components. These minor cracks are not considered defects and are not covered by our limited warranty.
- **Warping** - Warping occurs in wood when the absorption and release of moisture creates "stress" in the wood. In many instances, this condition will resolve itself after the cabinetry in your home goes through a heating and cooling cycle. Warping of components is allowed up to one quarter inch (1/4") and is not considered a defect covered by this limited warranty.
- **Fingerprints** - Fingerprints can occur on wood products, especially darker painted finishes, due to oil and residue left on the human hand. Fingerprints are normal and are sometimes found on products that receive heavy usage or were not installed with hardware on doors, drawers or other accessories. Fingerprints on our finishes and products are expected to occur with normal usage and are not considered a defect covered by this limited warranty.
- **Household Cleaners** - Certain household cleaners and other substances, whether acidic, basic or neutral, may affect the color and integrity of the Product's finish over time. Any such effects on the color and/or integrity of the finish are not covered by this limited warranty. Please contact your authorized dealer for care and cleaning instructions.

LIMITATIONS OF LIABILITY

- This warranty applies only to normal indoor consumer use. Product used for commercial or outdoor use is excluded. Not covered under this warranty are cabinets showing normal wear and tear; cabinets that were not stored or installed properly, improperly assembled or disassembled, intentionally damaged, misused, or exposed to elements; cabinets that have defects due to excessive moisture, accidents or negligence; and cabinets that have been changed or modified in any way.
- This warranty is expressly limited to the repair or replacement of the defective component

WARRANTY

parts at our discretion. Our liability is expressly limited to the cost of material for the repair or replacement of defective goods. We may elect to repair or replace the product with a product of equal or lesser value and complementary style if the original style is no longer available. Due to the aging process of natural wood, Craft Cabinetry can't guarantee an exact match between the finish of the existing product and the replacement product.

- In no event is Craft Cabinetry liable for incidental, indirect, or consequential damages resulting from the use of our cabinets. This warranty does not cover the cost of assembly, installation, removal, subsequent damage or transportation of the defective product or replacement.
- When a claim for warpage/joint separation/wood growth is submitted, Craft Cabinetry may, at its sole option and after inspection, defer action for 12 months to allow the Product to acclimate to the installed environment.
- Some states do not allow limitations on how long an implied warranty may last or the exclusion and or limitations of incidentals and/or consequential damages. Therefore the above limitations may not apply.
- This warranty shows specific rights that may vary from state to state. Any claims made under this warranty must be presented in writing with a dated sales invoice accompanied by photographs of defective material.
- The remedies put forth above are your sole and exclusive remedies and outline Craft Cabinetry's entire liability for any breach of this limited warranty.
- No other implied warranties apply.
- This limited warranty is effective for product manufactured by Craft Cabinetry on or after January 1st, 2024.
